

VISIONARY SYSTEMS AV

CCTV Install Technician Job Description

In this role you will be working with other Techs installing CCTV systems on job sites and working with our clients to efficiently and safely execute the required task at a high and consistent level. Problem-solving and the use of initiative skills are a must. You will report and coordinate with the project manager throughout the development of the project, ensuring the site has the tools and materials needed and tasks are complete per the project's scope. This job is a traveling position as we do work all over the state of Texas.

This job is starting as a Full-time Install Technician but has a high potential to become full-time, a site manager, and grow with the company. The hourly pay is based on experience and knowledge.

Essential Skills:

- Problem Solving
- Written and Verbal communication skills
- Ability to lead a team and plan for tasks accordingly
- Excellent customer service skills
- Microsoft word
- PC user
- Clean drivers license
- Ability to interpret construction plans and systems charts
- Willing and ready to learn
- Knowledge of terminating cat cable and use a cable tester

Preferred Skills:

- Knowledge of IT networks and their back ends
- Knowledge of low voltage systems and cabling
- Knowledge of IP Based Camera Systems

Knowledge of Access Control Systems

Physical Requirements:

Must be able to work at height on ladders, scaffolding, and lifts

Stand, walk or kneel for prolonged times

Can lift at least 50 lbs of weight in frequency

Must have a valid driver's license and be able to operate a vehicle
